

Knitting a Hat on the Knifty Knitting Loom

- You will need to get a knitting wheel either as part of a kit or they are sold separately.
- A good source on line is www.provocraft.com . If you search under products for “knifty knitters” a variety of option will come up.
- Knitting looms can also be found in most craft or fabric stores.

For the hat you will want to use the green loom and follow the included instructions.

You can use any yarn in muted colors. Wool-Ease seen below needs to be used as a double strand. Homespun brand seen below will work as single strand.

The finished product should look like this. However, I recommend using muted colors for the soldiers!!!

(This hat was knitted using single strand “thick & quick” yarn by Lion Brand)
